## PROFESSIONAL EXPERIENCE

**Front End Web Developer**                                                    08/2023 – present
*Universal Phoenix Group LLC |* 🔗                                                  Remote, US
UPG-LLC is a global entertainment, marketing, and technology management and consulting group. I worked as a remote front-end focused web developer in collaboration with a team around the globe.

**Junior SEO Analyst**                                                        09/2021 – 01/2023
*Tinds* 🔗                                                                         New York, US
Conducted comprehensive technical on page SEO in Yoast. I have also worked in wordpress web development in Elementor.

## PROJECTS

**ByteBazaar** 🔗
*A marketplace to trade digital assets. This is one of my favorite projects powered by Next 14 and MongoDB as Backend. Integrated admin dashboard, stripe payment and clerk as Auth Provider.*

**Muslim AI** 🔗
*Integrated OpenAI and trained data to facilitate learning history, fiqh, rulings and many more. It provides video, images, conversation generation to generous free trials, stripe payment integration, top notch authentication and many more.*

**QuranDreamers** 🔗
*Driven by a profound passion for the Arabic language, I am in a leadership role in a WhatsApp community comprising over 3,000 members. In an effort to enhance communication and facilitate interaction between mentors and students, I have developed a dedicated website for the community.*

## SKILLS

**Javascript Stack- React, Next JS, Node JS**
Expertise and frequently used technologies/frameworks/languages: Redux, Typescript, Tailwind css, ExpressJS, MongoDB, Python, Django, Postgresql, Supabase, Prisma, React Query, npm, Figma, Trello etc

## LANGUAGES

Proficient in English and Arabic. Native in Bangla.
